

WHITE PAPER
VERSION 2

Thonic is the world's first ever cryptocurrency tied to a full-service financial platform exclusively focusing on the digital market. The benefits of holding Thonic's utility token¹ are twofold: firstly it is designed to turn a profit simply by owning the token and secondly it gives you access to our Report Library, which houses performance reports on select cryptocurrencies.

One of Thonic's key goals is making investing in cryptocurrencies accessible to the general public by simplifying the coin buying and exchange processes and discussing digital currencies in conversational language. Helping you with everything from buying the right token and avoiding rug pulls to managing your coin portfolio, Thonic is the answer to all your digital investing needs.

Abstract.

Financial firms rely on a team of analysts to make educated decisions when buying publicly traded stocks to ensure they continue to turn a profit. The role of the analyst is to evaluate the health of companies' stock on a regular basis and make recommendations for which stocks to buy, sell or hold steady. While this type of reporting is the gold standard in the financial sector, it is relatively non-existent in the crypto world. Some financial firms have started to include the top 10 cryptocurrencies in their reporting repertoire, but in doing so are overlooking thousands of other tokens. It is this void **Thonic** looks to fill. This type of reporting is imperative for cryptocurrencies both to help potential holders buy into profitable tokens but also to protect them from scams.

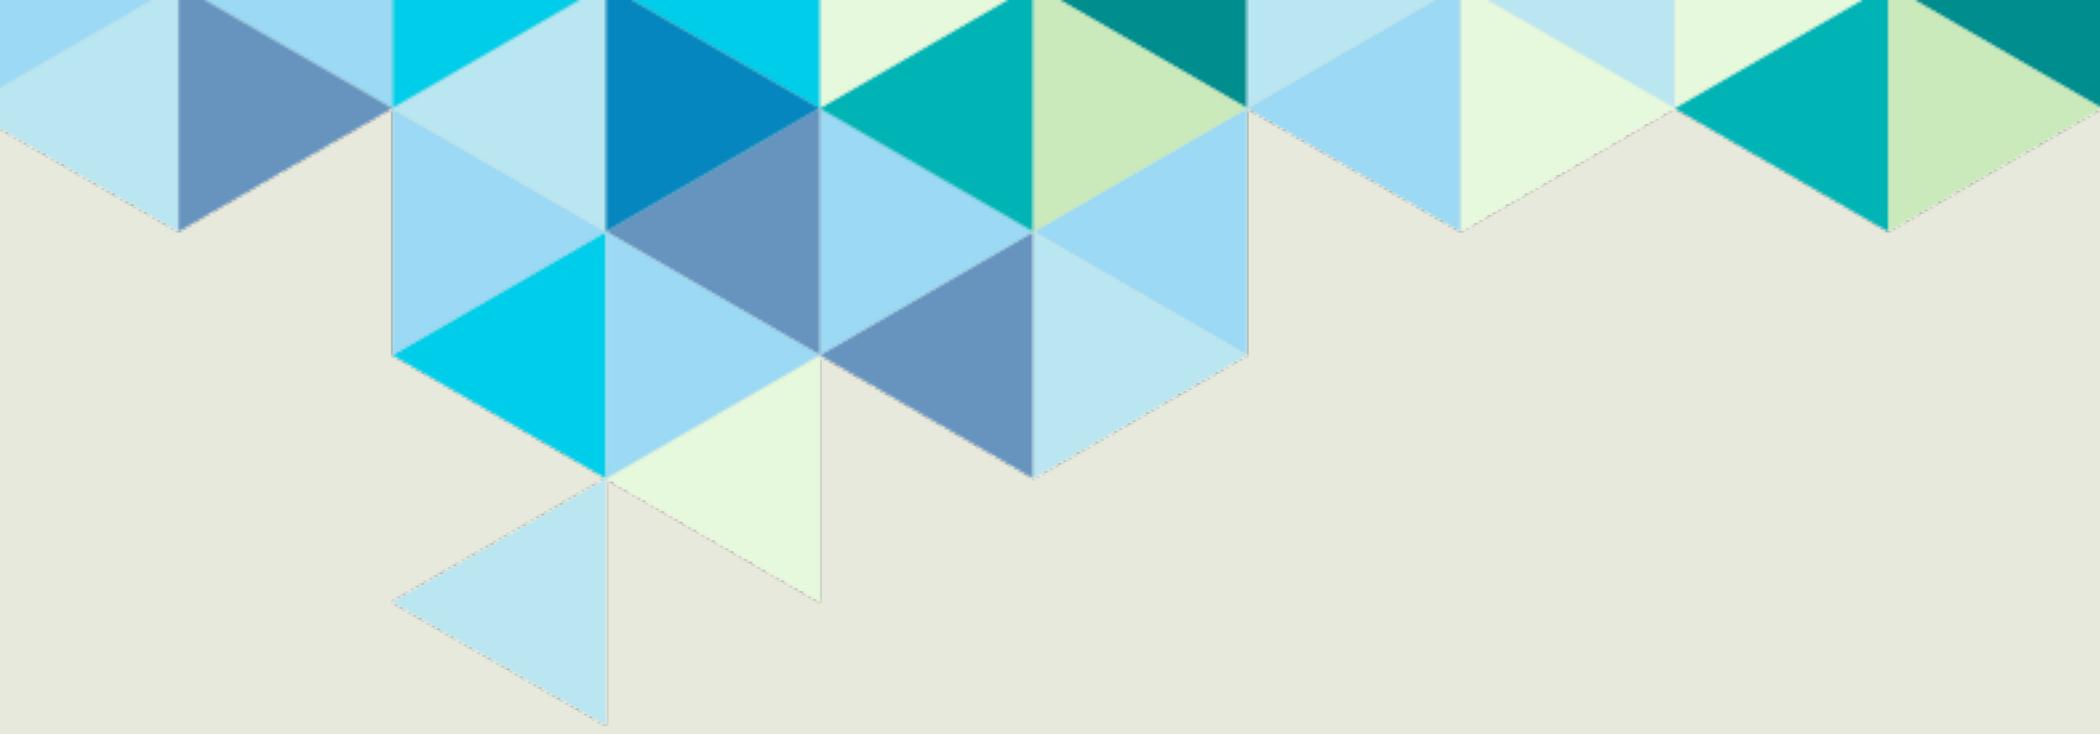

About.

Thonic is proud to be the world's first token tied to a financial reporting network that focuses exclusively on the performance of cryptocurrencies. Our team of analysts will research, vet and create standardized financial reports for selected tokens. The reporting will answer the following questions and use this information to assign a rating to each cryptocurrency:

- How is the cryptocurrency performing?
- Is the proposed project associated with the cryptocurrency feasible?
- Are the creators meeting the project's milestones?
- What are the creators' credentials?
- Are the crypto's social communities legitimate?
- Has the cryptocurrency undertaken any audits? What does the result of the audit mean for the success and legitimacy of the crypto?

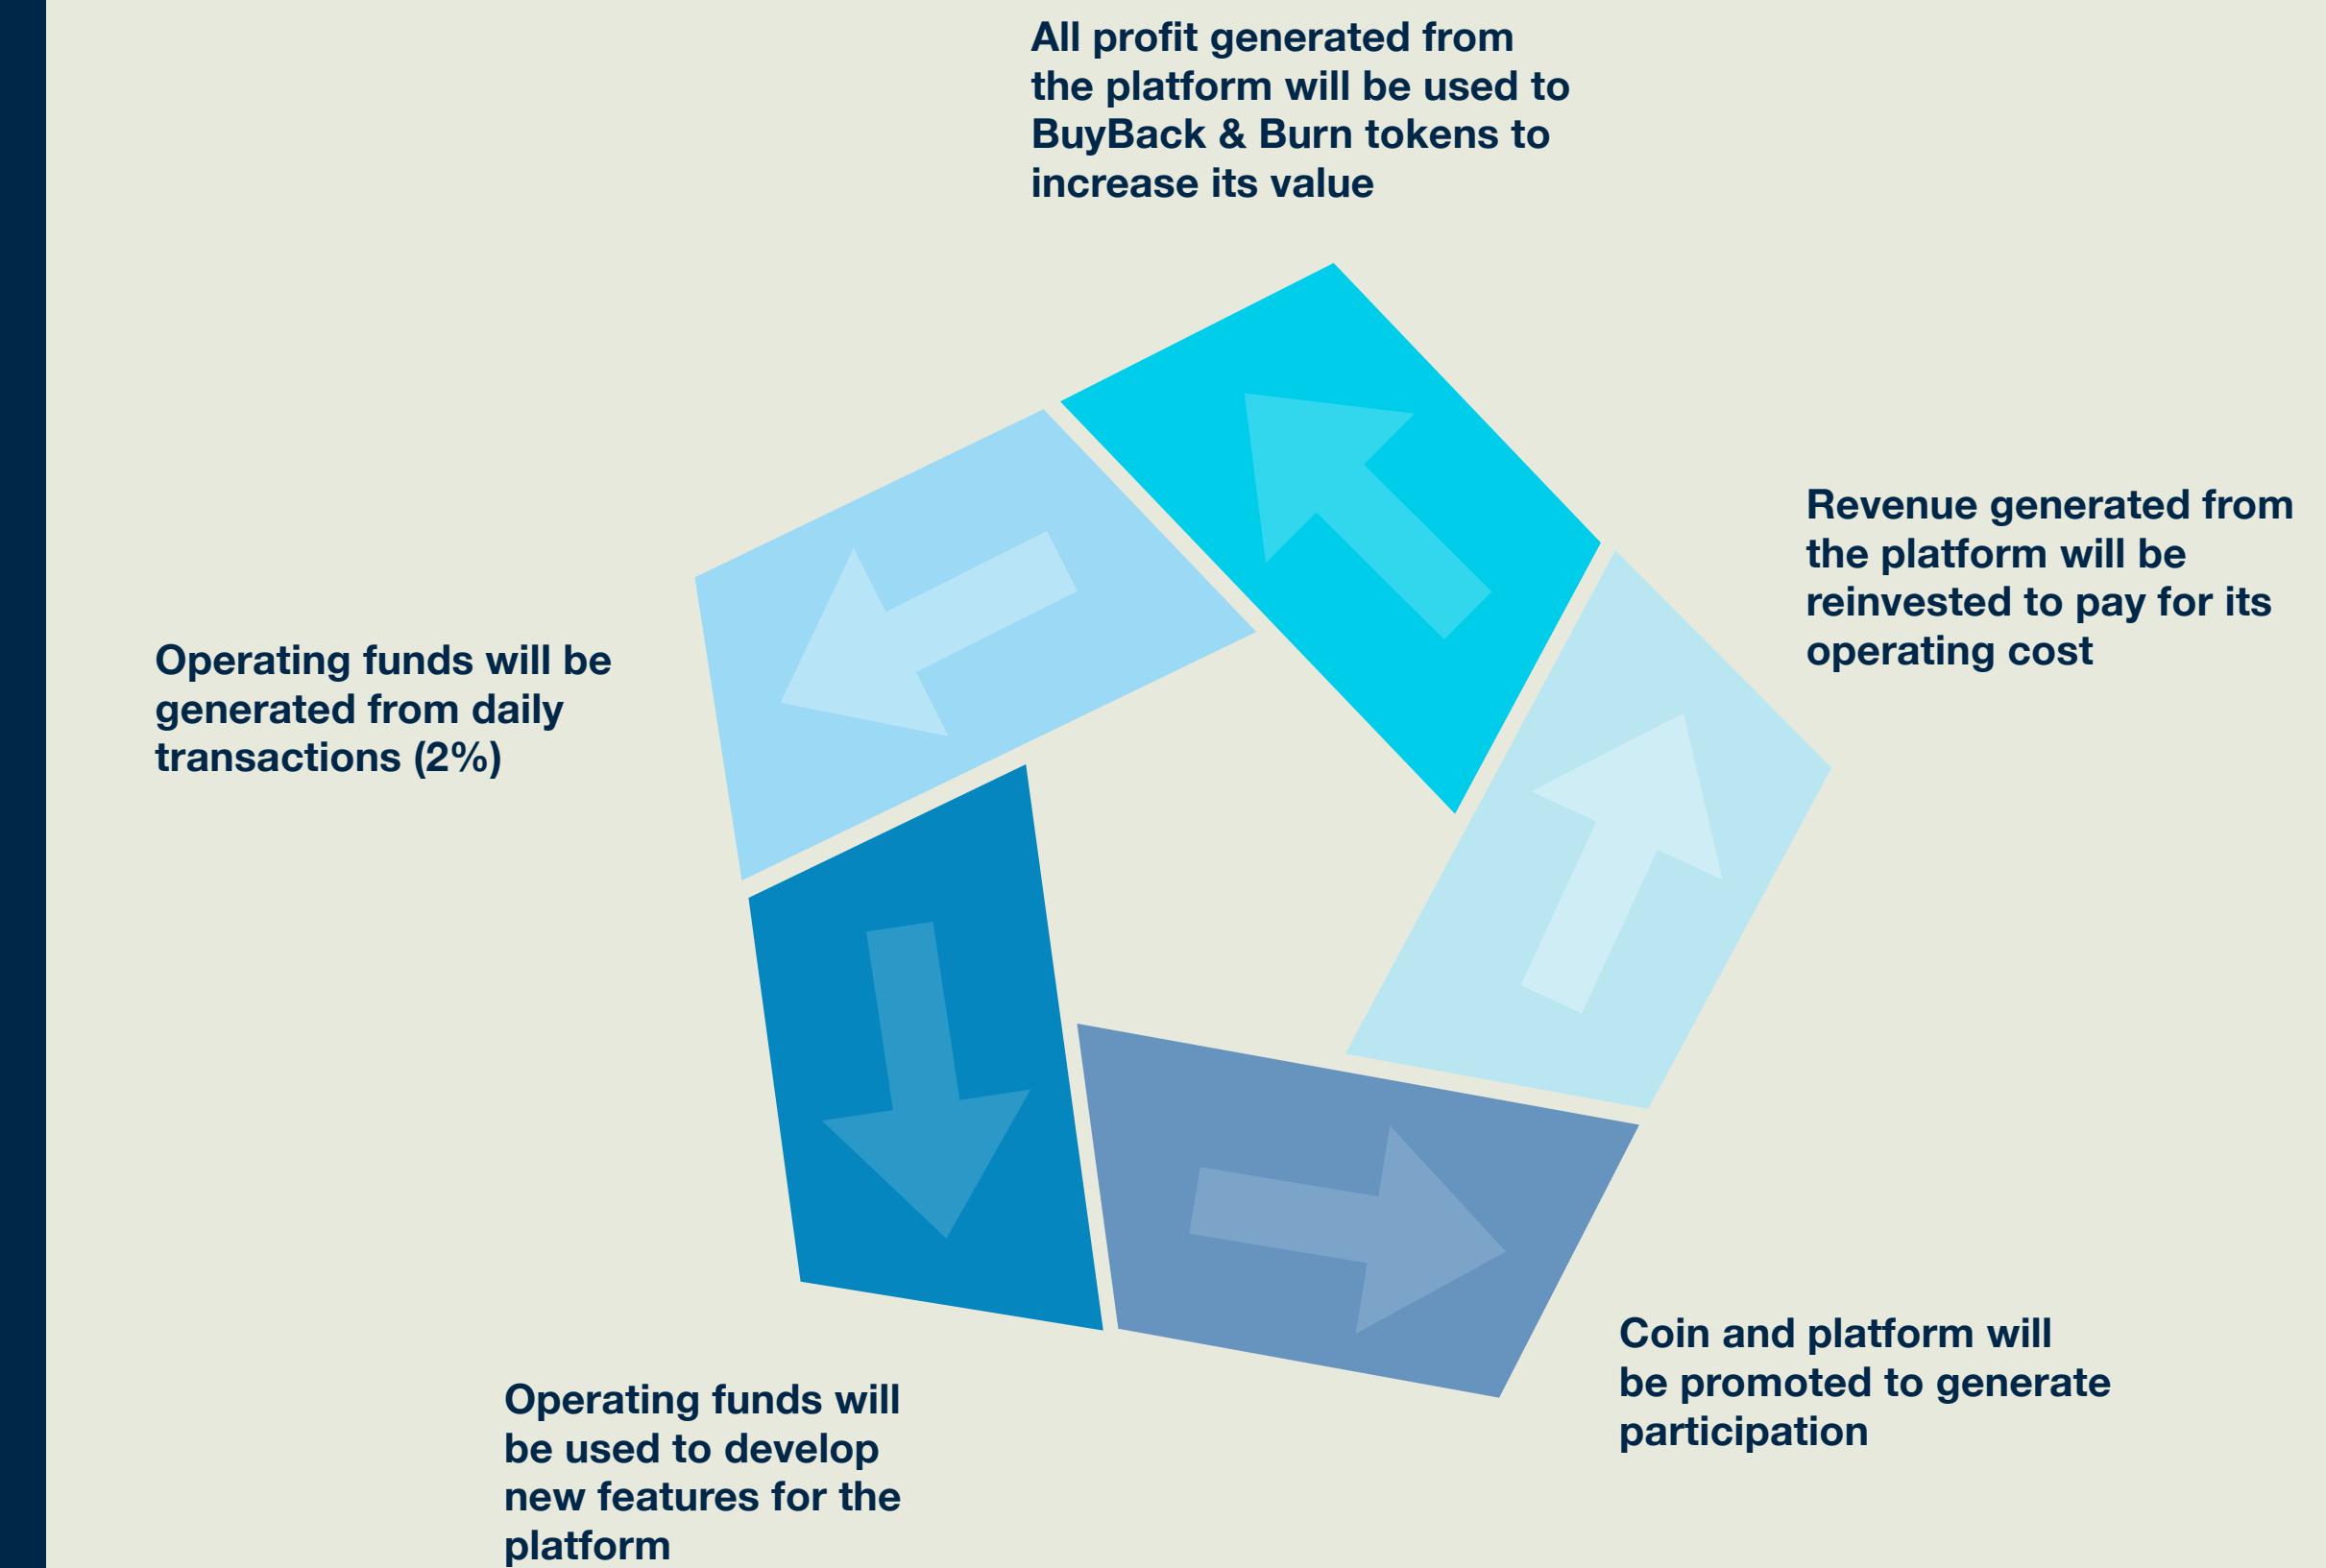

The Report Library will be included in all tiers of the **Thonic** platform and be provided as a SaaS (software as a service) product free of charge to all **Thonic** token holders with a minimum balance². Additional subscription paid financial services will be offered in the future to help investors manage buying and selling alt-tokens.

Platform.

Thonic's platform will be a software service that offers a variety of financial tools to help investors decide which cryptocurrencies to invest and hold, and in future also help them manage their portfolios. The platform will be released in multiple phases and have a multi-package pricing model, with each tier offering more personalized financial tools.

All profit from the platform will be used for the BuyBack & Burn of **Thonic** tokens. Please see the Tokenomics section for further information.

Phase 1.

The first phase of our platform will offer standard decentralized utilities to help holders purchase the **Thonic** token:

- Earnings Calculator
- Swap Exchange
- Direct Token Purchase

Phase 2.

The second phase will see the launch of the Report Library, which will house the standardized financial reports on cryptocurrencies and be updated with new reports weekly.

These reports will be based on extensive research and manually created by our team of analysts. There are two ways to access the Report Library, the first being subscribing to the service and paying a monthly fee. The second option, and our recommended course of action, would be to buy and hold a minimum balance* of **Thonic** tokens and access the library for free. Not only will it save you from paying the monthly fee, you will also generate profit by simply holding the token!

Phase 3.

The third phase will see the launch of additional customer service based financial tools aimed at helping crypto holders:

1. The ability to add cryptocurrencies to your watchlist and receive notifications when financial reports for those coins are updated.
2. Brokerage tools which will make purchasing alt-tokens and cryptocurrencies more accessible and reduce the number of transactions needed to buy tokens.
3. A portfolio management dashboard that compares the performance of your holdings over time to that of the crypto industry.

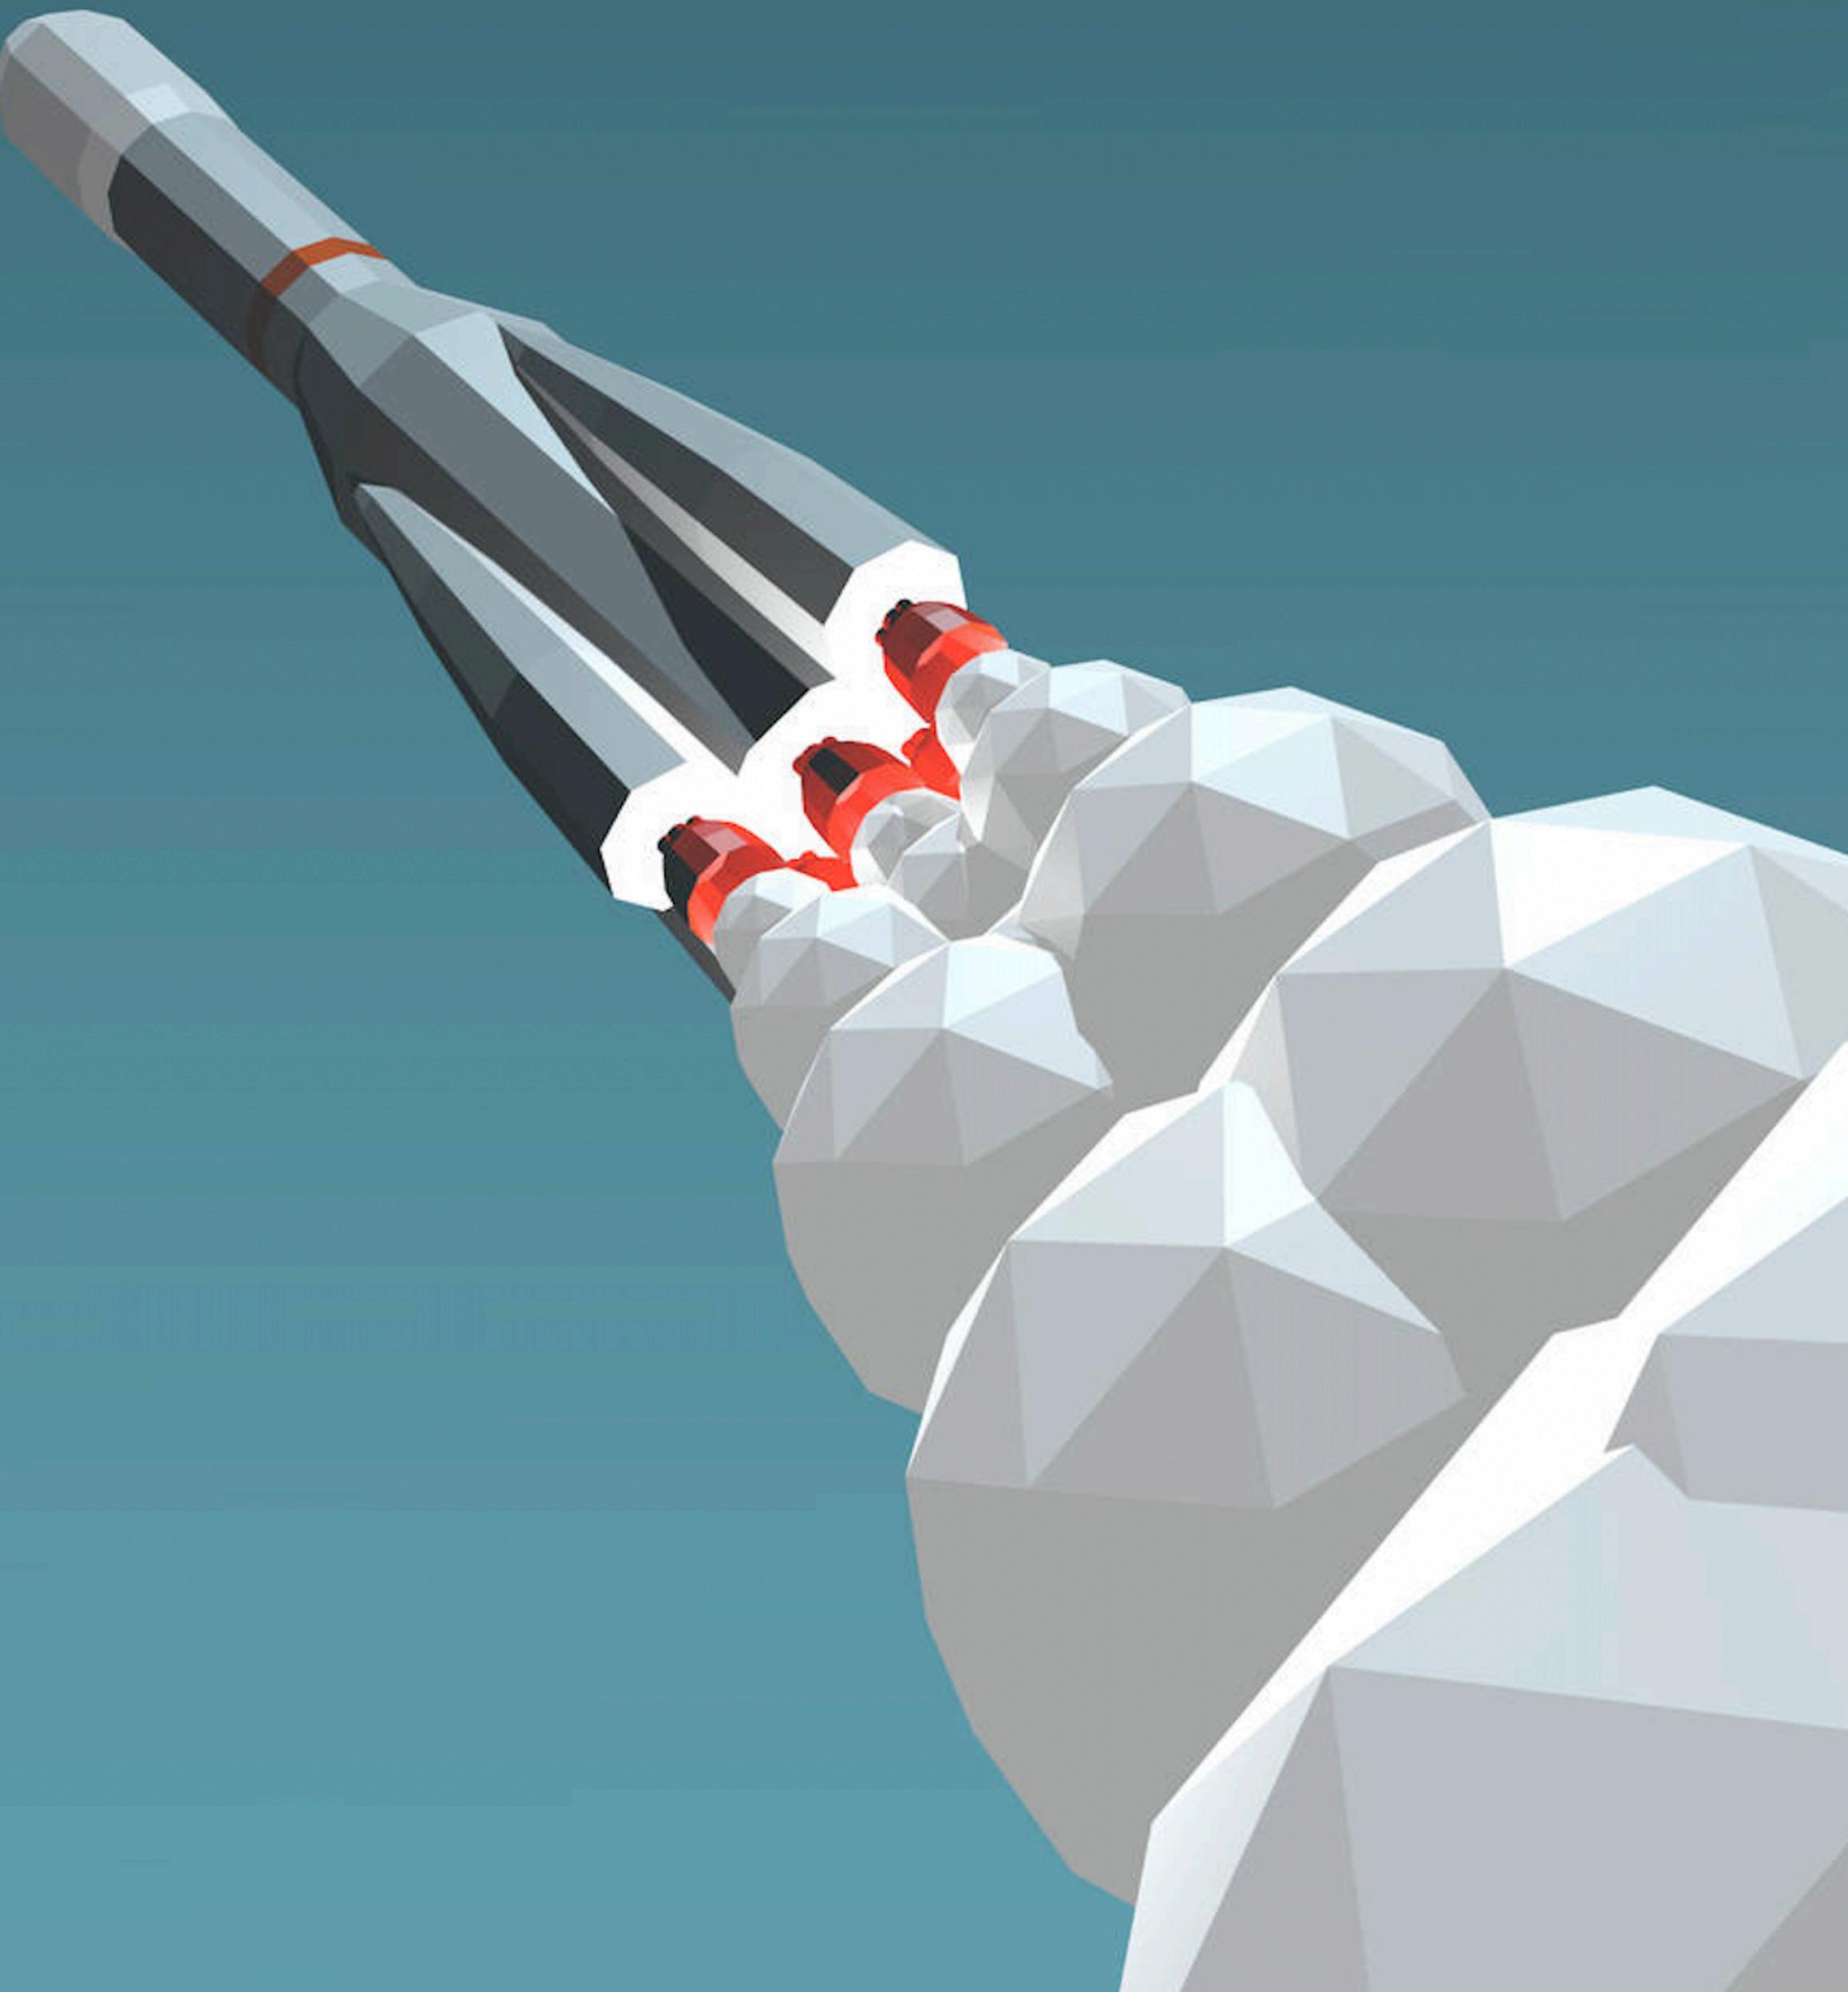

More details will follow closer to the launch of Phase 3.

Token.

Thonic utilizes two key strategies to ensure holding this token is profitable: BuyBack & Burn and earning passive income. All profit generated from the platform and its services will go directly to a BuyBack & Burn of **Thonic** tokens until a threshold of ~95% is reached. BuyBack & Burn is beneficial because it encourages price stability and increases the value of the token by creating a reduction in supply. In terms of passive income, 5% of every **Thonic** token transaction gets redistributed to token holders in Binanced Pegged USD (\$BUSD) so that simply holding the token generates a profit. **Thonic** is designed to be held longer term to benefit from both passive income and capital appreciation. **Thonic** is designed to be self-sustaining with a percentage of every transaction being used to fund the operations and growth of the project.

Supply.

Built on the Binance Smart Chain because it has faster block speeds (up to 10x) and lower transaction costs, **Thonic** has a total initial supply of 100,000,000,000 coins. Further coins will be burnt with the platforms profits.

Tokenomics.

The total tax on buy, sell, and transfer transactions is 8%, with the breakdown of the proceeds being distributed as follows:

- 5% of every transaction is redistributed to all holders in \$BUSD.
- 1% of every transaction is transferred into the liquidity pool on Pancakeswap to create a stable price floor.
- 2% of every transaction is sent to the company wallet to fund marketing, utility development, and community management.

Buying THONIC.

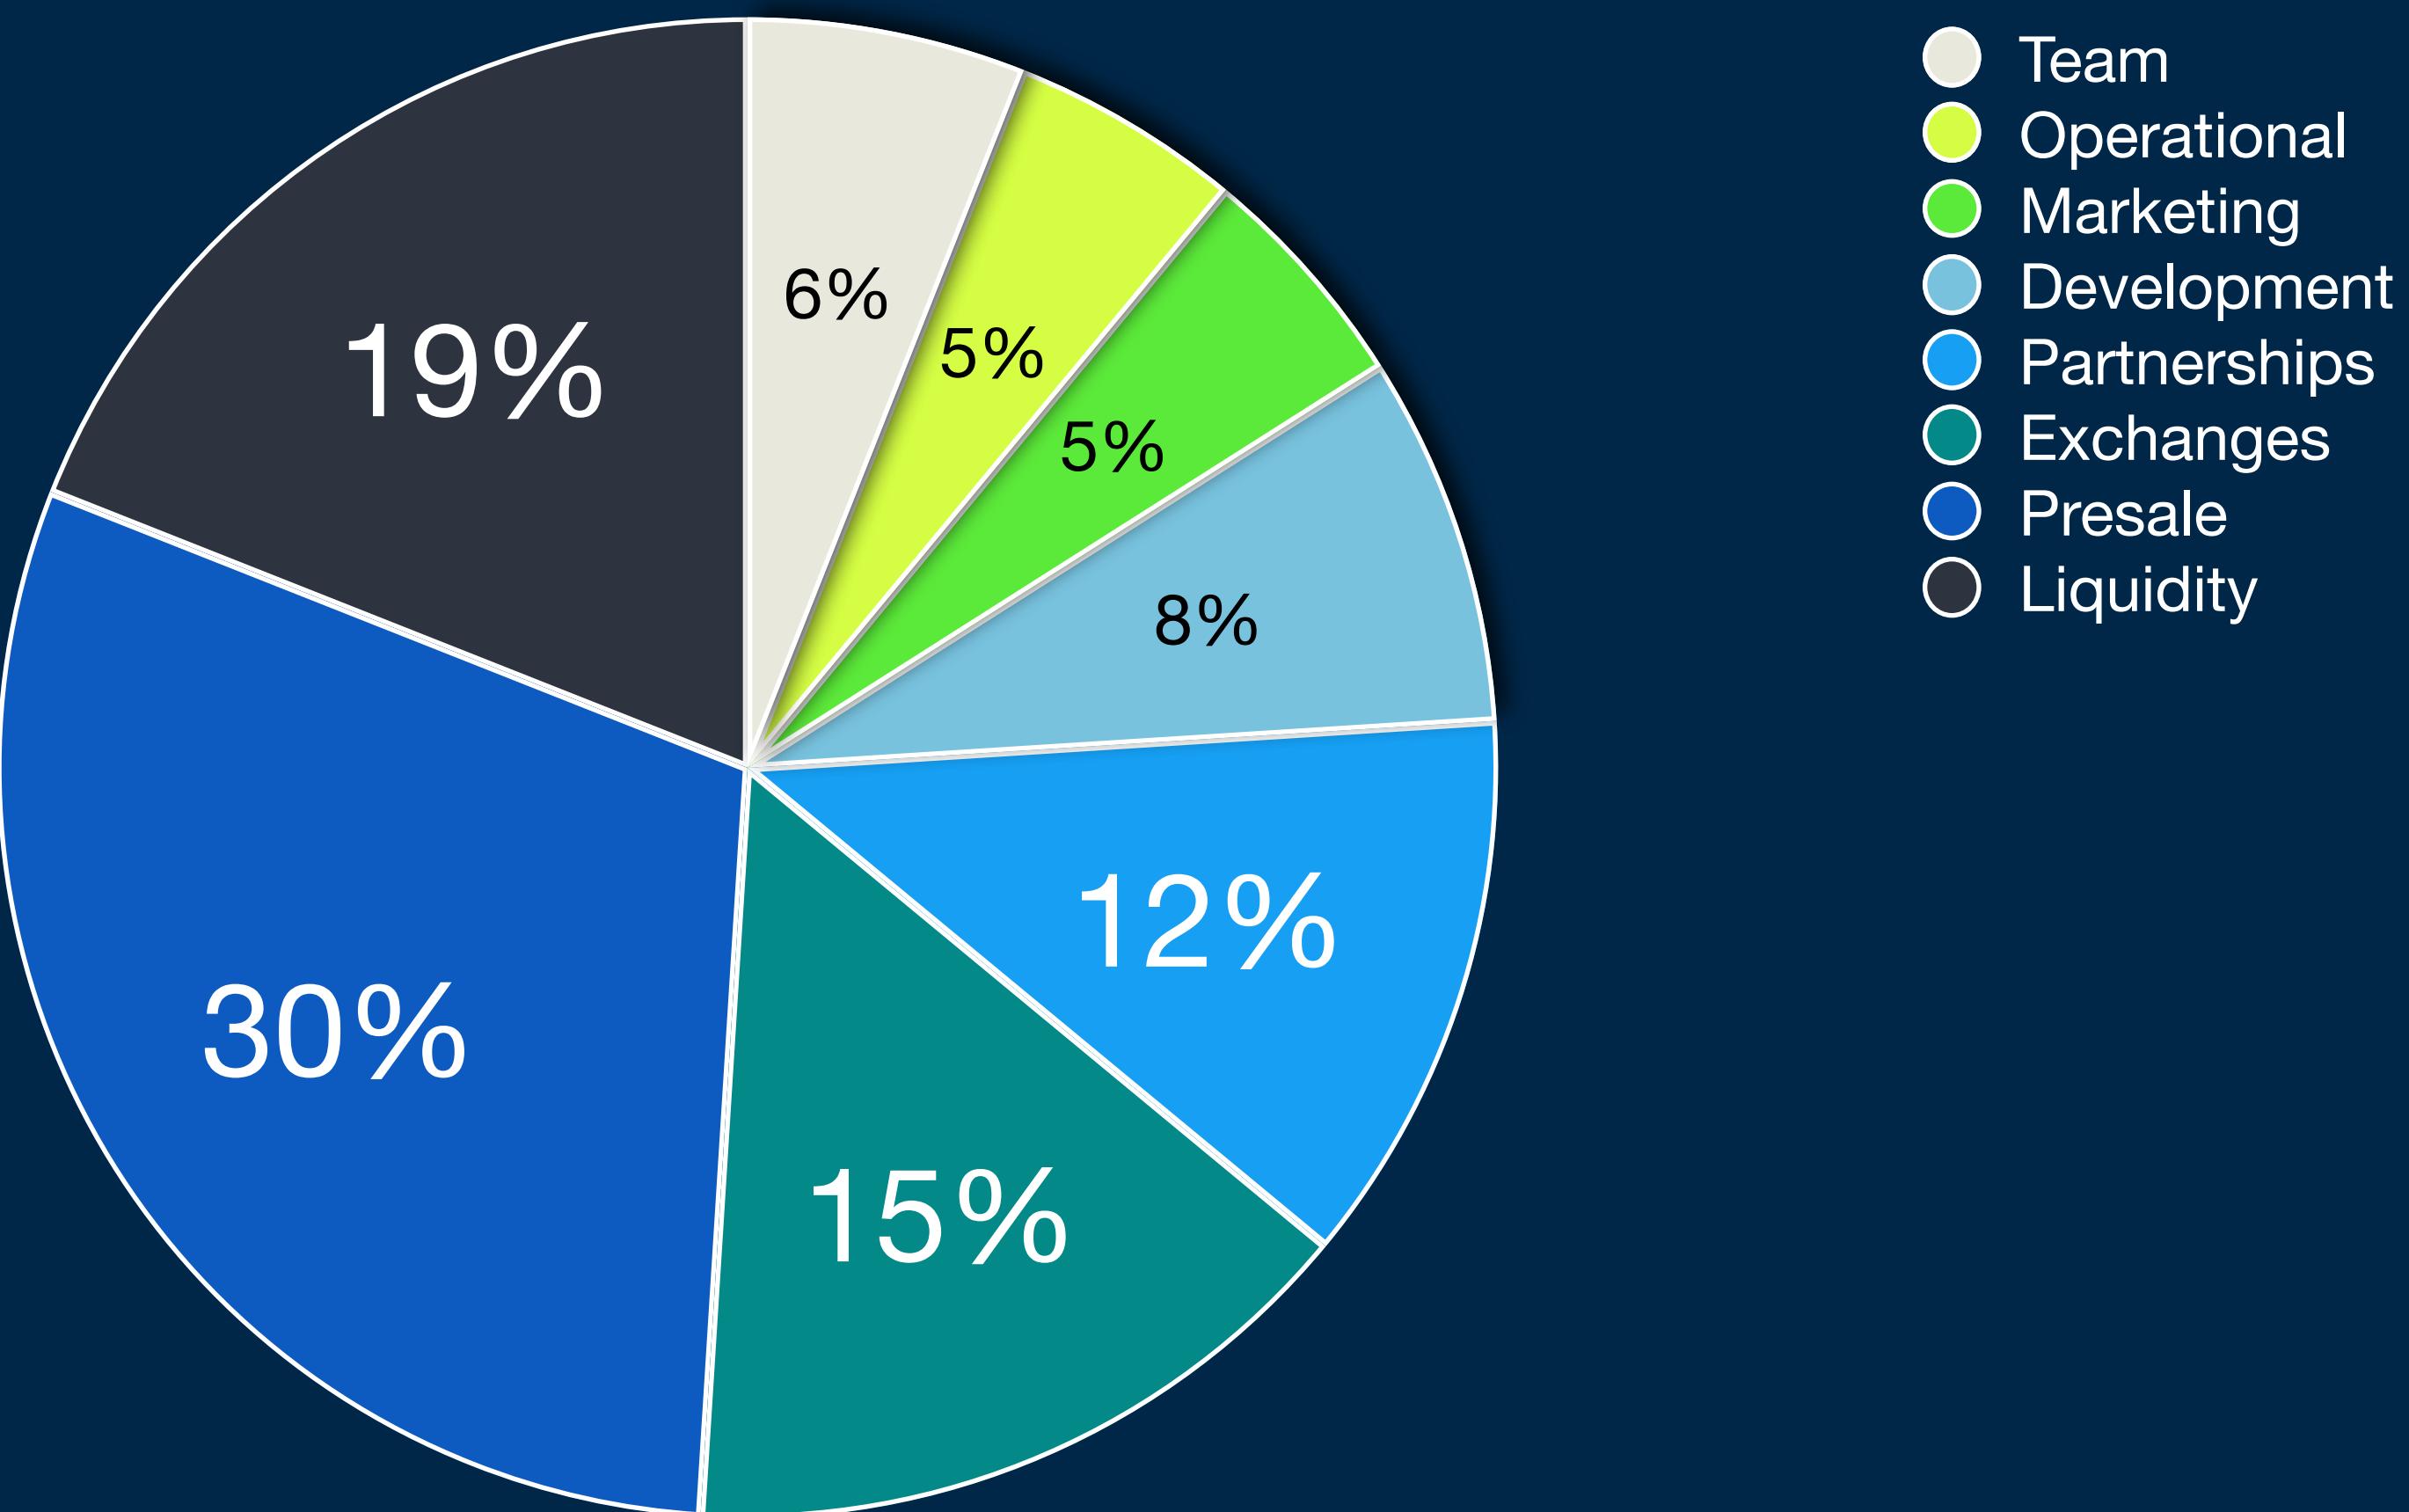

Presale.

30% of tokens are allocated to **Thonic**'s presale and all funds generated from this event will be used to build and promote **Thonic**'s platform.

Exchanges.

After the presale, the token will initially be available on Pancakeswap. Overtime the token will become available on more exchanges.

Token distribution.

Roadmap.

The goal is to complete one phase per fiscal quarter and have the platform beta launched in the summer of 2023. That being said, if all the milestones in a phase are ready before the end of the Fiscal Quarter, we will move onto the next phase immediately.

Phase 1.

- Whitepaper release
- Website launch
- Contract deployment
- KYC, dox & audit
- Raising capital

Phase 2.

- Raise funds
- Social development
- Marketing development
- 1000 telegram followers
- 250 holders
- Accepting requests for the whitelist presale

Phase 3.

- Presale
- Coin market cap application
- Coin gecko application
- 2000 telegram followers
- 500 holders
- Add 2 ambassador to team

Phase 4.

- Poocoin ads
- Coin market cap ads
- Marketing outreach
- How to buy videos
- 2000 holders

Phase 5.

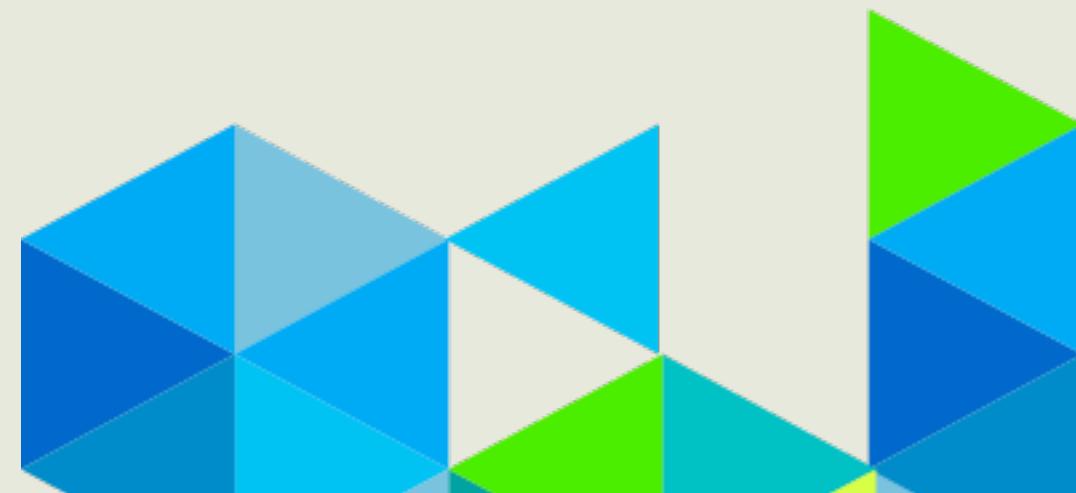

- Alpha launch of platform
- Earnings calculator
- Direct token purchase
- Swap exchange
- Add 5 analysts on the team

Phase 6.

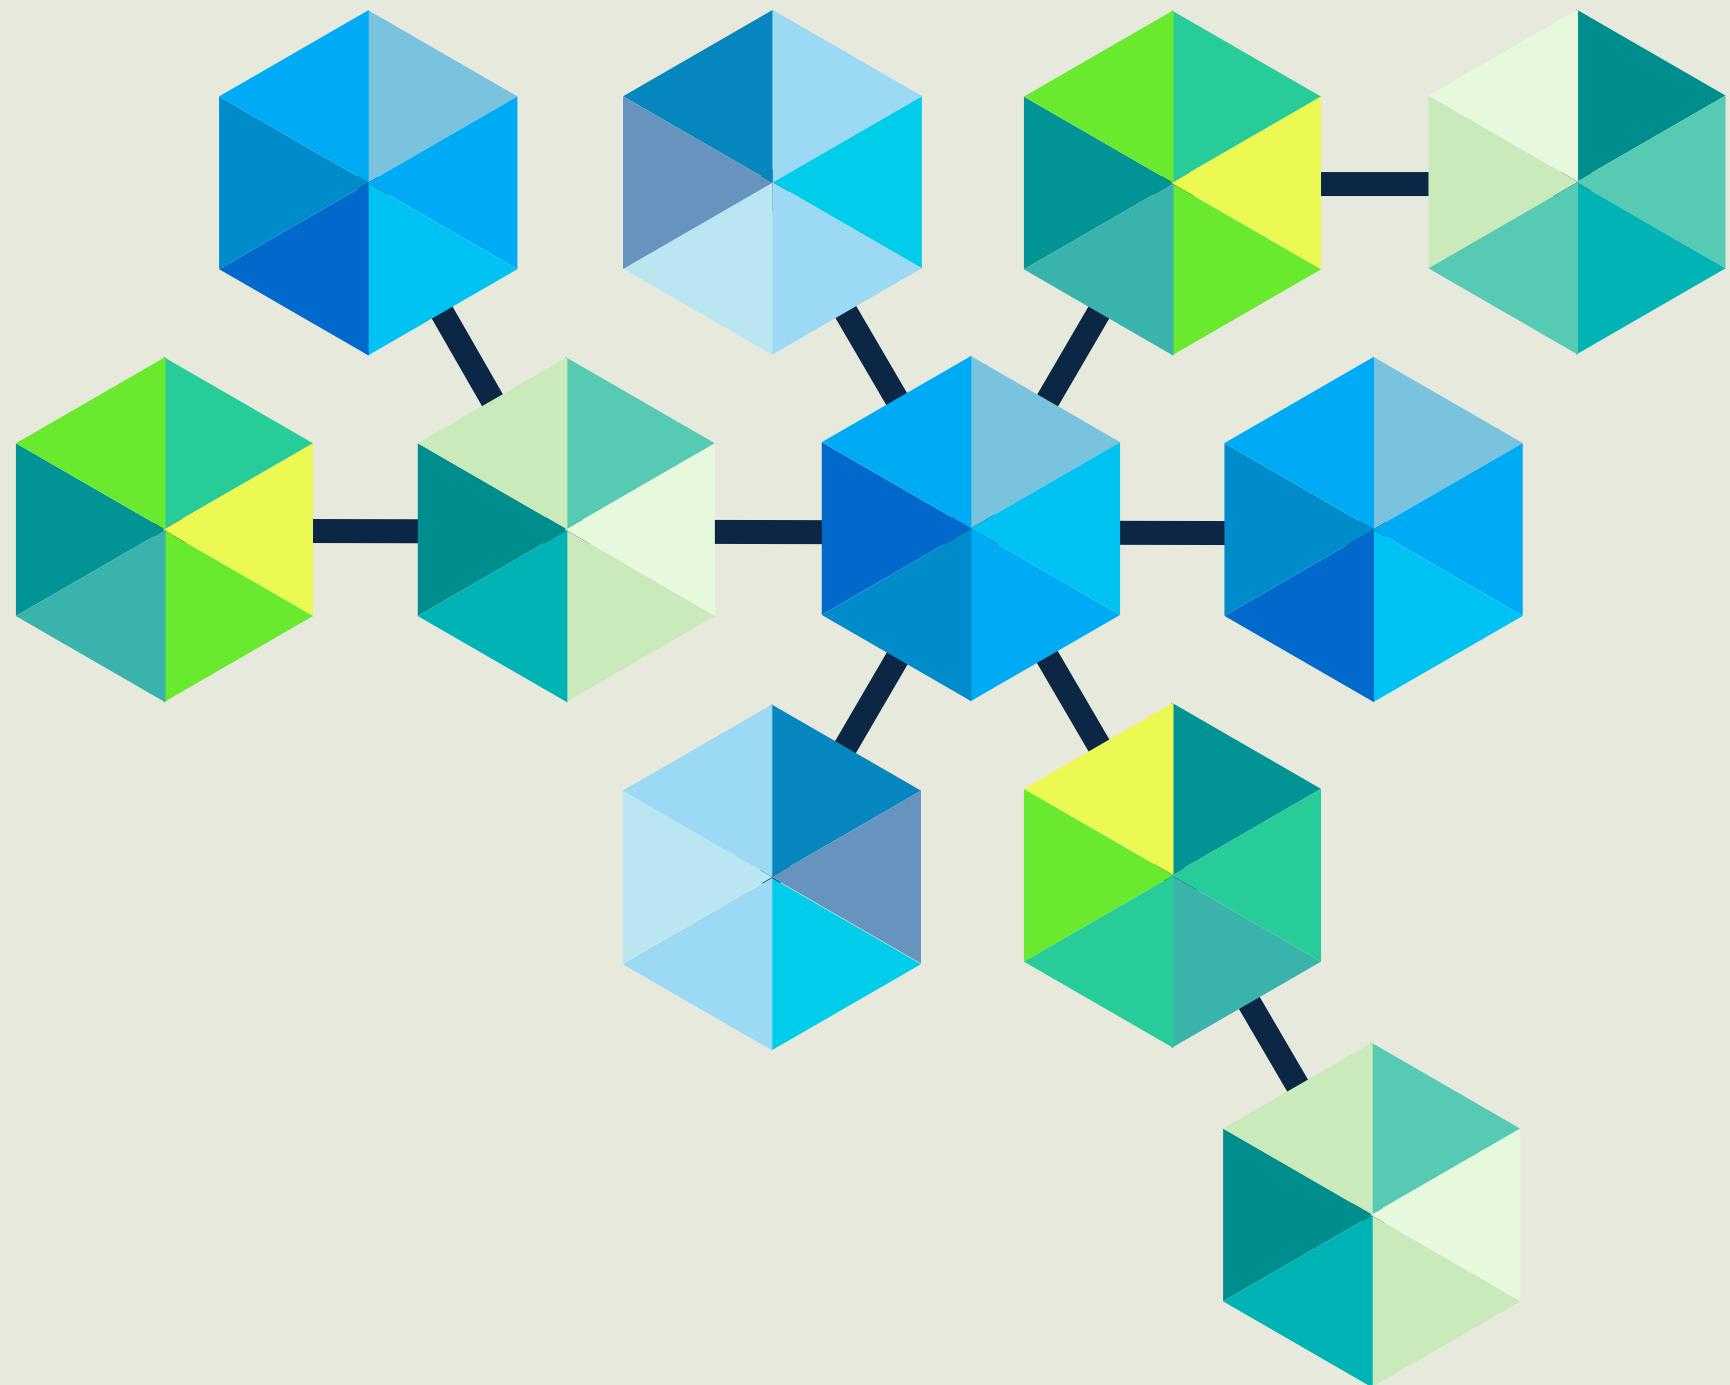

- Beta launch of platform
- Report notification and subscriptions
- Portfolio management
- Add 10 analysts on the team
- 250 platform subscribers

Team.

The Thonic team is made up of a group of accomplished professionals and entrepreneurs working in diverse fields. Their collective experiences in computer science, starting successful businesses, securities investment, marketing and advertising armed them with the necessary skill set to launch a cryptocurrency. In addition, they are crypto holders who have been dabbling in digital currencies for a number of years and found an opportunity to help people invest in this space with confidence. Connect with them via telegram and social media to find out more about this project!

Trust.

As cryptocurrencies grow in popularity, unfortunately so do the number of scams. The Federal Trade Commission reported that \$80 million dollars were lost to crypto scams in 2021 alone³. With this rate of fraudulent cryptocurrencies, it is imperative that investors trust the projects they buy into and that the team is made up of qualified individuals. **Thonic** has taken the below steps to be establish trust and transparency in its coin:

1. Publish team wallet addresses
2. Locked liquidity for 365 days in a third party secured locker
3. Communicate with the community

Transparency.

The **Thonic** team is made up of a diverse group of professionals and established entrepreneurs who have a wealth of experience in computer science, investing and marketing. Not only will you see our names and pictures on our website, we will:

- Be doxxed at launch
- KYC verified
- Communicate with the community through regular AMAs, Twitter and Youtube.

Longevity.

Filling a massive gap in the industry in terms of accessibility, credibility and coin portfolio management, **Thonic** is in it for the long haul! The combination of being run by an experienced and knowledgeable team along with being tied to a digital cryptocurrency Report Library will guarantee **Thonic**'s success and establish it as a must-purchase coin of 2022. Launching in the second quarter of 2022 and planning on being fully functional by the end of the year, **Thonic** is ready to shake up the industry!

Thank you.

Appendix.

1. A utility token has wider functionality than a coin. Utility tokens do have value, but they cannot be considered money in the same way as a coin. Utility tokens provide value to investors by giving users access to a future product or service.
2. A minimum balance of tokens in your wallet equivalent to \$250.00 USD is required to bene from the platform free of charge.
